

Dear team,

I have spent all day setting up Dragon speak a program that I just purchased. This is going to enable me to get things in the computer at a faster rate to be more efficient in cultural acquisition and to be able to have stories in the computer for worldview learning. I am trying it out for the first time as we speak it is 1130 and I cannot sleep so I figured that I would try this out and send you all a message with my first trying so here it is.

Many things have been happening here in Cardston. A new native member has been coming to our experiencing God Bible study. He travels about an hour one-way to come on Sunday evening. He is a great encouragement to the whole group as some of the group has been lax in coming and participating. He is a new believer and one that has grown up on the reserve. We are in chapter or unit nine of experiencing God and it's challenging the whole group to put into practice what we have been learning about God and our faith in him.

Much of my time has been used in studying about Mormonism and reading stories that help me understand the worldview of native people.

Cardston church, I believe is on the verge of participating in God size tasks. I'll be leading Wednesday night Bible studies and I have decided that we need to just come together as a church and pray asking God what is it that he wants us to be involved in here specifically. We are claiming the promises of Scripture and trusting he will reveal what tests he has for us as a church. I cannot tell you how excited I am. The church elders have been seeking God for direction and are open to hearing what He has to say. When God did God size tasks in the Bible such as David and Goliath, Gideon and the Midianites, Jesus walking on water ECT, the result was worship. God has not changed. When we take up his tasks the result will be worship, for the believers involved and those around us.

Please continue to pray for our endeavors, as we continue to seek out God's direction for us here in Cardston and the blood reserve.

Serving Him together,

Roy

PS. I think with a little help Dragon Speak will be a great asset. This concludes our first attempt.
